

City of Boulder, Colo., Signs Agreement for Tyler Technologies' Munis® ERP Solution to Transform Business Operations

Colorado city chooses Tyler for its integrated Munis solution and deep public-sector experience

PLANO, Texas – Dec. 4, 2013 – Tyler Technologies, Inc. (NYSE: TYL) today announced that the city of Boulder, Colo., has chosen Tyler's Munis® [enterprise resource planning](#) (ERP) solution to replace its 20-year-old public administration system, made up of disparate software systems. With its integrated Munis solution, Tyler gives the city the functionality it needs to deliver government services and conduct activities in the way it wants, while helping to ensure the city's future financial sustainability.

As part of its Transform Boulder Business Initiative (TBBI) to improve business processes, Boulder city officials searched for an integrated, organization-wide ERP solution that could replace the current financial, human resources, payroll processing and asset management applications. One of the factors in the city's decision was Tyler's sole focus on products that serve the public sector.

[Munis](#) was selected after a competitive review. In addition to an integrated solution, the city of Boulder wanted a commercial off-the-shelf (COTS) solution like Munis that would require very little, if any, customization. Officials also made the decision based on Tyler's successful track record, financial strength and ability to be a long-term partner for the city. As a user-friendly system that offers numerous features and functionality, including Tyler Content Manager, Munis will help the city of Boulder meet its efficiency and operational goals.

"The city of Boulder is unique in many ways, and city leadership clearly stated its goals of rejuvenating business practices and modernizing its technological approach to better serve its community," said Richard E. Peterson Jr., president of Tyler's ERP & School Division. "Throughout the negotiation process, we communicated to the city that we were committed to being its partner for the long-term. We believe that this commitment, combined with Tyler's public sector expertise and the functionality of Munis, will help Boulder better and more efficiently leverage its technology resources."

The city of Boulder, which is located about 35 miles northwest of Denver, serves approximately 100,000 residents with about 1,200 employees and an operating budget of about \$240 million.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" seven times and the company has been included four times on the Barron's 400 Index, a measure of the most promising companies in America.
